

1. Patient's concern(s):
2. Profile:
3. Face frontal:

SKELETAL:

4. Skeletal frontal problems:
5. Frontal facial skeletal asymmetry:
6. Skeletal (ANB): Class
7. Maxilla position (SNA):
8. Mandible position (SNB):
9. Mandible size (Co-Gn):
10. Skeletal Vertical (FMA):
11. Asymmetrical mandible:
12. TMJ PAN:
13. TMJ X-ray:
14. TMJ clicking/popping/locking exam:
15. TMJ condylar resorption:
16. Cross bite (ant/post):
17. Cross bite at class I occlusion:

DENTAL:

18. Dental Class: / // / mm
19. Crowding: mm
20. Dental Bite:
21. MX Transverse U6-U6 lingual= (36-38mm ideal)
22. Cross bite: MX-MN=
23. Scissors bite:
24. Bolton analysis anterior (77.2%):
25. Bolton analysis Full (91.3%):
26. Proclination upper anterior teeth:
27. Proclination lower anterior teeth:
28. Asymmetry Dental:

- 29. Upper 1s to face:
- 30. U1s to the right of face ____mm
- 31. U1s to the left of face ____mm
- 32. Functional Shift: No
- 33. Tapered teeth/small teeth/small laterals:
- 34. Missing teeth:
- 35. Tipped teeth:
- 36. Dental - conditions of teeth:
- 37. Sinus:
- 38. Impacted teeth:
- 39. Ectopic eruption:
- 40. Root resorption visible at start:
- 41. Gingival display:
- 42. Root canal treated teeth:
- 43. Ankylosed teeth:

PERIODONTAL:

- 44. Periodontal health
- 45. Pockets:
- 46. Recession:
- 47. Periodontal Bone loss:
- 48. History of periodontal issue:
- 49. Oral Hygiene:
- 50. All restorative dentistry on patient's treatment plan has been completed:
- 51. Wisdom teeth:

AIRWAY:

- 52. Snoring:
- 53. Tonsils:
- 54. Family history of Sleep apnea:
